

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A method for inserting a toolbar into a webpage ~~at a server machine, said method comprising:~~  
receiving a webpage at ~~the~~ a remote server machine to be delivered to a client ~~machine~~;  
inserting an executable script into the webpage operable to render a toolbar into the webpage at the server machine ~~when executed by a client browser~~, the toolbar including at least one link to a resource ~~and an executable script~~; and  
delivering the webpage including the executable script to the client ~~machine~~.
2. (Original) A method as recited in claim 1, wherein the at least one link is a graphical link.
3. (Original) A method as recited in claim 1, wherein the executable script is an activation script.
4. (Original) A method as recited in claim 3, wherein the activation script determines whether the toolbar is displayed in the webpage when the webpage is displayed at the client machine.
5. (Currently Amended) A method as recited in claim 3, wherein the webpage has ~~at least more than one frame~~,  
wherein an instance of the activation script toolbar is inserted into each frame of the webpage at the remote server, the activation script operable to render the toolbar into each frame of the webpage machine.

6. (Currently Amended) A method as recited in claim 5, wherein, for each of the ~~at least one~~ instances of the activation script toolbar, the activation script determines whether the toolbar is displayed in the ~~at least one~~ an associated frame of the webpage when the webpage is displayed ~~at by~~ the client machine.

7. (Currently Amended) A method as recited in claim 5, further comprising:  
determining a size of each frame in which the toolbar is to be displayed using the  
activation script inserted into each frame;

comparing the size of each frame to a threshold size; and

rendering the toolbar for each frame having a frame size greater than the threshold size.

~~wherein, for each of the at least one instances of the toolbar, the activation script determines that the toolbar is to be displayed when the webpage is displayed at the client machine when both the activation script is within one of the at least one frame of the webpage and the size of the one of the at least one frame is greater than a threshold size.~~

8. (Original) A method as recited in claim 1, wherein the toolbar is a HTML toolbar, and wherein the executable script is provided in a script programming language.

9. (Original) A method as recited in claim 1, wherein the resource is a remote third-party resource.

10. (Original) A method as recited in claim 1, wherein the toolbar includes a plurality of links to different resources.

11. (Original) A method as recited in claim 1, wherein said method further comprising:  
executing the executable script on the client machine to determine whether the toolbar should be displayed when displaying the webpage on the client machine.

12-16. (Cancelled)

17. (Currently Amended) A computer readable medium including at least computer program code for determining whether a toolbar should be displayed in one or more frames of a webpage, said computer readable medium comprising:

computer program code for determining whether an activation script for rendering a the toolbar is within thean HTML code for one or moreeach frame frames of thea webpage having more than one frame;

computer program code for determining thea size of theone or more frames each frame of the webpage using the HTML code; and

computer program code for displaying-rendering the toolbar in each of the one or more frames of the webpage when in which the size of a frame the one or more frames exceeds a threshold size and suppressing-displaying-not rendering the toolbar in each of the one or more frames of the webpage in whichwhen the size of a frame the one or more frames does not exceed the threshold size.

18. (Original) A computer readable medium as recited in claim 17, wherein the webpage and the toolbar are further provided on said computer readable medium.

19. (Currently Amended) A computer readable medium including at least computer program code for inserting a toolbar into a webpage at a server-machine, said computer readable medium comprising:

computer program code for receiving a webpage at ~~the~~ a remote server machine to be delivered to a client-machine;

computer program code for inserting an executable script into the webpage operable to render a toolbar into the webpage when executed by a client browser at the server machine, the toolbar including at least one link to a resource ~~and an executable script~~; and

computer program code for delivering the webpage including the executable script to the client-machine.

20. (Original) A computer readable medium as recited in claim 19, wherein the executable script determines whether the toolbar is displayed in the webpage when the webpage is displayed at the client machine.

21. (Cancelled)

22. (New) A computer readable medium as recited in claim 17, wherein the threshold size of each frame is defined by the activation script within the webpage.
